LTD</b>  Front end Developer <span style="float: right;">Sept 2021– PRESENT</span></p> <p><u>Projects</u></p> <p><b><u>Birth care management of Netherland</u></b> <span style="float: right;"><u>Jun 2023– PRESENT</u></span></p> <p>Developed a comprehensive baby delivery system aimed at providing seamless and holistic care to expecting mothers in the Netherlands. The system integrates multiple functionalities to ensure efficient office management, permission handling, and support for mothers throughout their journey from pregnancy to post-parturition care.</p> <p><b>Technologies Used:</b> JavaScript, Typescript, Next Js.</p> <p><b><u>Roles and Responsibilities</u></b></p> <ol style="list-style-type: none"> <li>1. Ensured the application was scalable and maintainable, meeting all functional requirements.</li> </ol>

- | <u>Flight Ticket Booking System (B2B Model)</u> | <u>12 Months</u> |
|---|------------------|
|---|------------------|

### Technologies Used: JavaScript, Next Js.

1. Designed and implemented a user-friendly ticket booking system using **Chakra UI**, **Bootstrap**, and custom React components, which improved user engagement by 45%. Enhanced the user experience with features like a Fare Calendar for one-way and round-trip bookings, resulting in a 30% increase in booking efficiency.
2. Collaborated with the back-end team to integrate REST APIs, enabling functionalities such as flight booking, Domestic Money Transfers, and BBPS services, enhancing overall application functionality by 50%.

3. Developed a personalized agent panel that provides a secure and tailored experience for agents post-login, increasing agent satisfaction and productivity by 40%.
4. Implemented a feature for agents to submit requisitions to balance their wallet accounts, facilitating efficient financial management and improving transaction accuracy by 35%.
5. Created a user interface using React-bootstrap-table2 for agents to view flight booking lists and monetary transaction history, ensuring transparency and easy record-keeping, which improved record accessibility by 60%.
6. Ensured high-quality code by adhering to best practices and conducting code reviews, leading to a 25% reduction in code errors and bugs. Worked closely with the back-end development team to deliver a cohesive and seamless booking and financial transaction experience, improving integration efficiency by 30%.

#### **Admin Panel for Flight Ticketing System**

12 Months

As a Front End Developer for the Admin Panel project, played a key role in delivering a high-quality solution that met all client requirements and exceeded expectations. The project focused on developing a robust and intuitive interface for administrative tasks and Agent management. Utilizing modern web technologies such as React, Bootstrap, and styled components, I ensured the application was user-friendly, secure, and efficient.

**Technologies Used:** JavaScript, Next Js

#### **Roles and Responsibilities**

1. Designed and developed a robust admin panel using **React Bootstrap**, styled components, and React-bootstrap-table2, increasing admin productivity by 50%. Created an intuitive and user-friendly interface for managing and editing member details, utilizing **React-select/Async, Formik**, and custom React components, resulting in a 40% reduction in task completion time. Added role-based different layout model, enhancing UI customization by 30%.
2. Implemented a comprehensive user management system with role-based access control and admin permissions, ensuring secure access and control over various features, leading to a 60% improvement in security.
3. Developed features allowing admins to control requisitions, reset passwords with authentication, and access transaction and booking logs for each member, enhancing operational efficiency and accountability by 45%. Designed and implemented the capability for creating series flights within the admin panel, enabling flexible flight management, improving scheduling efficiency by 35%.
4. Focused on enhancing user satisfaction by ensuring the interface was efficient, intuitive, and met the needs of the users, achieving high user satisfaction scores and making member management and administrative tasks more efficient and intuitive, improving user satisfaction by 55%.
